

July 27, 2010

There are so many leasing companies out there – and frankly, they all have seemed equally mediocre in most of my experiences over the years.

I had been referred to Mike Becker of Matrix Business Capital recently as a good leasing contact and brought him in on a deal where the client was working with a couple leasing companies who were not able to help and Mike really impressed me.

Mike was the kind of guy that we want on our deals – attentive, hard-working, kept me in the loop, moved things forward quickly, and ultimately was able to make things happen that others were not.

If you have a client looking to lease gear – I would recommend bringing Mike in on the deal.
